**BIROBIDZHAN REORGANIZES SOCIETY OF DOCTORS**

Ya. Mitsogodler, Chairman

Birobidzhan Scientific Society of Doctors

The Birobidzhan Scientific Society of Doctors has been functioning for over 8 years, but results were unsatisfactory up to 1947. The doctors formerly met only occasionally in scientific conferences but since 1947 the society has reorganized and drawn up a work schedule. Doctors now attend scientific conferences regularly, on an average of twice a month. The range of problems considered is increasing. Professors of the Khabarovsk Medical Institute are among those who read reports at the conferences. At a recent conference Doctor Kessel'nikov read the main report on biology in medicine.

The administration of the Society has made it possible for its members to make trips to Khabarovsk in order to prepare their reports with advice from instructors at the Khabarovsk Medical Institute. The 2,000-volume medical library of the Jewish Autonomous Oblast Health Department is extremely helpful to the Society's doctors.

The majority of reports in 1949 will be concerned with the results of practical work of doctors in medical institutions of the Jewish Autonomous Oblast and results of new methods of treatment. The Society will also disseminate medical knowledge more widely among the people and improve its co-operation with young doctors on duty in rayon and settlement hospitals.
